# Small Continent, Large Population

Many people live in Europe. It is the second-smallest **continent** in **area**. But it has the third-largest **population**.

# DID YOU KNOW?

- Ancient Greece was an early society that came up with important ideas that the world still uses today.
- In Venice, Italy, waterways flow through the city instead of streets. People take boats to get to places.
- Vatican City is a country that is smaller than New York City's Central Park!
- The Bosphorus River divides Istanbul, Turkey into both Europe and Asia.

The Colosseum is a famous **landmark** in Italy. In France, the Eiffel Tower looks out over Paris.

# Where Is Europe?

To Europe's north is the Arctic Ocean. The Atlantic Ocean lies to Europe's west. To its south is the Mediterranean Sea. Asia borders eastern Europe.

The **prime meridian** passes through Europe. This places Europe in the Western, Eastern, and Northern **hemispheres**.

# The Land and Climate

Alps

FC

Low **plains** cover much of Europe. Forests and **tundra** blanket the north.

Some mountains rise in Europe. The Alps cross central Europe. The Pyrenees separate Spain and France. Europe's eastern border in Russia is made by the Urals.
