Tide Pool Partners

by Jamie Ortega

Hermit crabs and sea anemones can often be found in tide pools along the shore. In some cases, these animals are meant to be together.

anemone

hermit crab

A hermit crab has no tough shell of its own. Instead, it has to look for an empty shell that it can use. When its shell gets too small, the hermit crab has to make a change.

Example:

faucet

sauce

haul

fawn

claws

dawn

Muskrat

Match a label to each clue. Then copy the labels onto sticky notes and place them on the correct parts of this muskrat.

paws

head

whiskers

tail

fur

1. These look like threads.
2. These have claws that look tough enough to make any threat stay away.
3. This is soft to the touch and is often dark, but it sometimes changes to a tawny shade.
4. This gets hauled behind as the muskrat saunters along.
5. This is big and contains two small eyes.
