The koala is a special animal.
It looks like a small bear.
But it is not a bear.

It can hear very well.
It can **smell** very well.
But it cannot see very well.

When a koala is born, it has no ears, eyes, or hair.

baby with Mom

It grows in its mother's **pouch**.
Mothers keep their babies there.
This is the same way kangaroo
mothers keep their babies.

Koalas come from only one country.
They are from Australia.

Koalas live in only one place.
They live in **eucalyptus trees**.
