Buying and Selling

“I’m going to sell lemonade!” says Stella.
She counts seven lemons.

$$7 - 4 = 3$$

She needs four lemons to make juice.
That leaves three lemons.

“Can I have these?” Stella’s brother asks.

“Sure, Max!” she says.

Max takes the three lemons.

Stella sets up her stand.
She has ten cups to sell.
But Max took two!
Now she only has eight.
