Sending Messages

“Hello, class! Today we’re going to learn about the nervous system,” says Mr. Rajab. “But first, I’d like to know what you did over the weekend.”

“I listened to music,” Noah says.

“I went to karate class!” Maria says.

“I learned chess,” Sara says.

“Did you know that your nervous system helped you do all those things?”
Mr. Rajab asks.

“How?” asks Sara.

“It begins with the brain.
Your brain is the leader
of your nervous system,”
Mr. Rajab says.

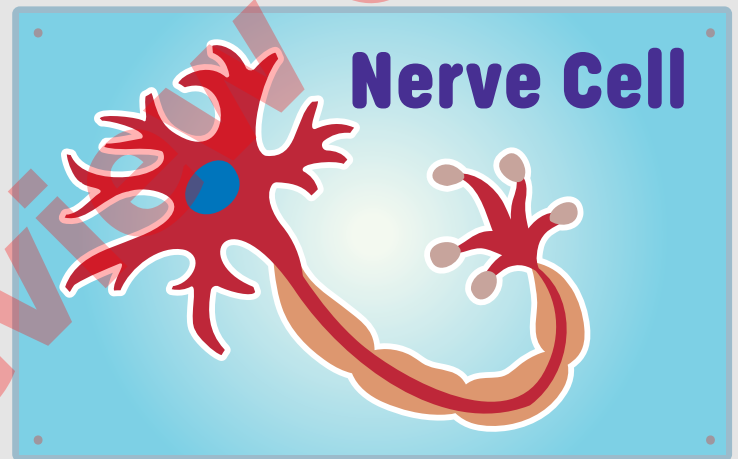

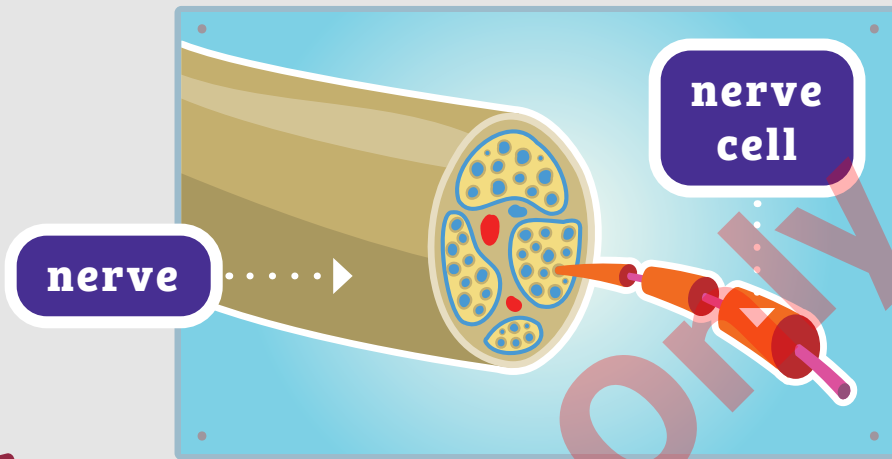

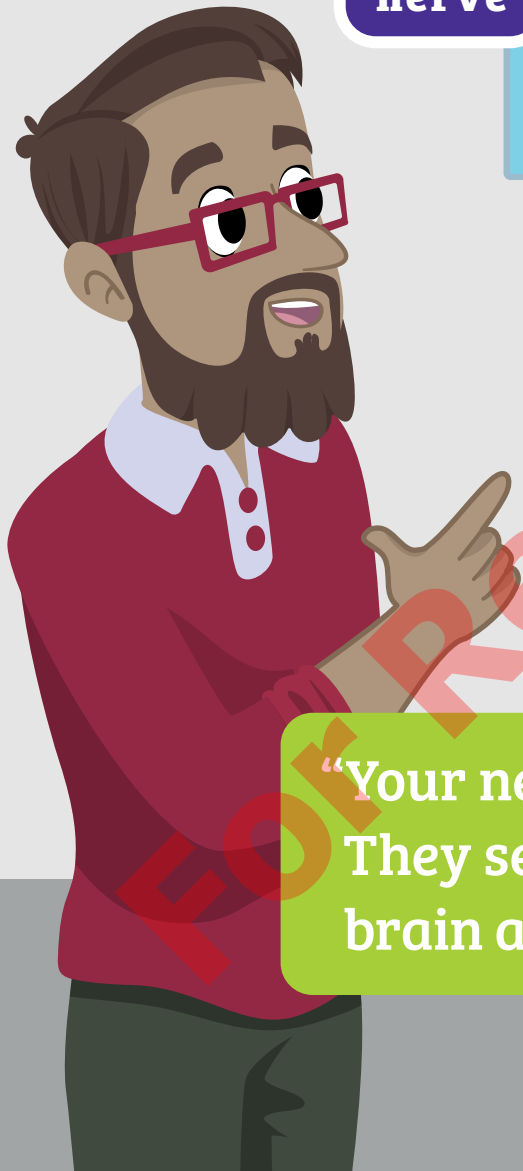

brain

“Your brain connects to your spinal cord. This long, flexible tube links your brain and your body’s nerves,” he continues.

spinal cord

nerves

“Your nerves form a huge network. They send messages between your brain and your body,” says Mr. Rajab.

Where in the Body?

Your brain, spinal cord, and nerves work together to control nearly everything your body does. Take a look!
