

FROG

moves out
of the **RAIN
FOREST**

by Nikki Potts
illustrated by Maarten Lenoir

The air is warm.
Food is plentiful.
The neighbors are nice.

It's the rain forest, and it's
where Frog calls home.

But Frog knows there
is much more to the
world, and she is
going to see it all!

Why not start at
the top of the globe?

Frog heads up north.

The trees remind
her of the rain forest.

MORE ABOUT POISON DART FROGS

Females leave their tadpoles in spiky tropical plants called bromeliads.

Poison dart frogs are toxic enough to kill. The toxins in their bodies come from the food they eat.

Poison dart frogs do not have webbing between their toes. This means they are not good swimmers.

Poison dart frogs can be one of many bright colors or a combination of colors.

Poison dart frogs catch bugs with their long sticky tongues.
